Offshore Crane Upgrades

Our major upgrade packages allow you to extend the life of your cranes by updating cabins, control systems, hydraulic systems, prime movers, winches, and slewing machinery, while maintaining your existing crane structure. This gives you the benefit of a technologically advanced crane without the cost of transporting and installing a brand new crane.

We are able to provide a full range of tailored services and upgrades for virtually all crane types and manufacturers.

- Lifetime extensions
- Component-replacement
- Capacity upgrades
- Legislation compliance
- Ergonomic improvements
- Modifications for man-riding
- Crane heightening

Modernization Options

- Mechanical & structural components
- Installing electrical systems
- Extending boom length
- Increasing or decreasing rail spans
- Increasing lift capacities

Standards and Classifications

- Manufactured in accordance with API standard and EN 13852-1, European Offshore Crane Standard
- Complies with all relevant classifications
