

Fleet Care

Aftermarket Projects Group

Optimal solutions for your Fleet needs.

We partner with you to ensure you have the most flexible and optimal solution to meet your unique challenges – keeping your rig and equipment running on time and on budget.

What we do

Our knowledgeable and experienced Projects team works close with you to help manage your project needs:

- Providing support through the NOV corporation, including coordination of all activities related to Equipment Recertification Projects, Equipment Upgrade Projects and Maintenance, Repair and Overhaul.
- Managing the pre-planning and scope identification, including thorough Surveys and Condition Assessments prior to project execution.
- Ensuring all necessary documentation through the whole project, such as COC (Certificate of conformance) and SOF (Statement of facts) for relevant class related equipment and systems.

What we offer

- Simple and seamless communication through the entire project, with a single point of contact that brings all our expertise together.
- Highly trained and competent personnel to ensure you get the most from your NOV equipment/systems.
- Improved efficiency on modified equipment/systems during projects. As OEM experts, we have in-depth knowledge of your NOV equipment.
- Reduced risk and cost through proactive scope management and by identifying and preventing potential problems and delays.
- High level of quality to ensure equipment meet industry requirements and standards.
- Service rate discounts on NOV Service Engineers.
- Spare Part return policy on unused stock items.

With offices in Houston (USA), Kristiansand (Norway), Stavanger (Norway), Macae (Brazil), Port Elizabeth (South Africa), Dubai (UAE), Montrose (UK), and Singapore (SIN) - our global team of experts is on hand where you are to ensure your rigs are ready when you need them.
