

Wilco Dual Air Compressor

The Wilco™ dual air compressor is skid-mounted with dual cylinder pumps and produce 410 ft³/min (680 m³/hr) at 1,072 RPM.

Our air compressor skids are fitted complete with a Tier-3 diesel engine (with radiator, fan, air cleaner, electric start, and emergency kill system), compressor air inlet filters, moisture separator, automatic drain, two 9.5 cu ft air receiver tanks, air to air after cooler with 12 volt fan, and belt guards. The compressed air outlet is fitted with one 3-in. kamlock and check valve. All equipment is mounted on an I-beam, skid-base with a four-point lift frame.

Each compressor is complete with shotblast and four-coat paint system.
