

RigVista

See the KPIs that matter across your rig fleet — all in one place.

RigVista gives you clear, connected operational insights at both the rig and fleet levels. No disconnected systems.

No fragmented operational insight.

We bring together operational data and metrics in one place so you can understand how your rigs are running and where to improve.

With intuitive dashboards and direct access through the MAX Portal, you can move from data to action faster and make better decisions across your operations.

RigVista helps you turn complex data into clear operational insights so you can make more informed decisions across every rig.

Features and Benefits

- Gain clear visibility into drilling, tripping, and automation performance
- Understand NOVOS application usage across rigs with integrated analytics
- Monitor key operational KPIs through simple, easy-to-read dashboards
- Identify opportunities to improve efficiency and performance
- Access insights through a unified MAX Portal experience
- Enable data-driven decisions across rig and fleet operations
