Key Features

- Machinery cab is generously sized for ease of maintenance
- Alternate hook attachments available for heavy lift applications
- Electric power-up and power-down
- Direct drive motors eliminate the need for clutches, reducing life cycle costs and maintenance
- Robust and reliable design provides strong performance while maximizing uptime
- High-speed hoist and slew reduces cycle times
- Balanced deck design
- Low center of gravity
- Elevated boom hinge for improved vessel clearance
- Environmentally friendly
- Global aftermarket organization
